

We are still here

Recent articles in the newspaper have frightened many, we are sure. Hope Creek Care remains committed to high quality, compassionate care for our residents. Financial constraints due to low reimbursement from the state have the County Board researching all options to reduce our expenses and increase revenue. Unfortunately, the media chose to center their stories on a potential for sale or lease of the facility. We want you to know that every option is being reviewed, every rock turned over and our commitment to the community remains intact.

- Hope Creek Care offers our residents experienced, long term, loyal nursing staff. Interaction with our residents shows compassion and a true commitment to provide the highest level of care.
- We offer a wide range of therapies to best help residents gain and maintain their highest level of functional mobility.
- Transitional care is offered to patients following a surgical procedure or other hospitalization.
- Our activity department always has something fun planned to keep our residents active, social and involved. Various special events throughout the year are held as well.
- Our state of the art facility offers a great deal of amenities such as an on-site vision center, salon/barber shop, chapel, meals with family, emergency call system, pharmacy, visiting therapy pets and more.

The County began care for our elderly and infirmed back in 1839. Our commitment to the community remains strong. We are confident that all possible options will be fully researched to ensure that the needs of our citizens continue to be met.

Hope Creek Care is still here to care for you. We would welcome the opportunity to offer comfort, treatment and activities.
